

Timiskaming Substance Use Referral Flow Chart (for service providers)

Timiskaming Drug and Alcohol Strategy (TDAS) aims to facilitate connecting people who use substances to local services. This referral pathway is intended to assist community partners to make appropriate and timely referrals to services and supports.

Steps to consider:

- 1. Engage the person in conversation related to their substance use health and discuss their goals.
- 2. Facilitate appropriate referrals based on their individual goals.
- 3. Provide appropriate contact information for referrals.

For a complete list of local services, supports and resources, visit www.tdas.ca. For questions: tdas@timiskaminghu.com.
